

DANIEL ANDREI SALIPOT

danielsalipot@gmail.com | 0939 504 4799 | Marilao, Philippines 3019

Summary

Full Stack Web Developer with years of experience building and maintaining production-ready web applications and systems. Experienced in developing real-world solutions such as QR-based registration, RFID cashless payments, and attendance monitoring systems for schools. Strong in backend development, database design, and system integration, with a proven ability to manage multiple projects and deliver scalable, reliable solutions.

Experience

Web Application Developer | Rakso CT | 01/2023 - Current

- **Full-stack Laravel Developer** with strong experience in building and maintaining web-based systems using Laravel, Livewire, Filament, Tailwind CSS, and MySQL.
- Experienced in maintaining and enhancing large-scale legacy systems, including **school management platforms and cashless payment solutions**, handling performance optimization, complex business logic, and production-level data constraints.
- Capable of delivering **end-to-end solo projects** from system design to deployment, including **IoT integrations** such as RFID, QR codes, biometric scanners, and turnstile systems.
- Skilled in implementing **automations and system integrations** using tools like **n8n, webhooks, and chatbots**, and experienced in **direct client communication** to gather requirements, provide technical solutions, and ensure successful project delivery.

Web Application Developer | Adamson University | 01/2022 - 12/2022

- Contributed as a member of the development team that built an informational website for the **Dumagat Remontado Tribe** as part of Adamson University's outreach program.
- The project focused on supporting and promoting the tribe's culture and traditions through a web platform developed using **Laravel (PHP)** and **Bootstrap**, helping improve digital visibility and access to cultural information.

Skills

- | | |
|-----------------------------|--------------|
| • Web Development | • Laravel |
| • Full-stack development | • Flutter |
| • MVC frameworks knowledge | • PHP |
| • Database Management | • SQL |
| • Android Development | • ReactJS |
| • Legacy system enhancement | • VueJS |
| • Agile methodologies | • Kotlin |
| • API integration | • JavaScript |
| • UI/UX Design | • C# |
| • CI/CD Pipelines | • N8n |
| • Git/Version control | • Java |
| • IoT integration | • Linux |
| • Figma/Designing | • n8n |

Certificates

Microsoft Technology Associate, Database Management Fundamentals, 2021-01-01
3rd Philippine Skilling Summit 2022, Agile Methodologies Track, 2022-01-01

Achievements

- **1st Place**, Rakso CT Hack4Impact 2025, 2025-01-01, Led my team to win **Champion** at the Rakso CT Hack4Impact 2025 **Hackathon** by building a Laravel and non-powered system that automates class data uploads and

generates interactive quizzes that students can answer via mobile, providing teachers with real-time performance insights. Everything was developed in-house within 24 hours.

- **1st Runner Up**, I.T. Skills Olympics 2022 (**Web Design Competition**), 2022-01-01, I represented Adamson University in the I.T. Skills Olympics 2022 and won 1st runner up in the Web Design Competition. The competition was held at the University of Makati and approximately 30 other schools participated.

Projects

OASYS - Overall Administering System, Web Based Human Resource Information System with Payroll System using Laravel PHP, Best Capstone: AdU IT&IS Department (2023), 2023-01-01

Education

Adamson University | 01/2023

Bachelor of Science: Information Technology

GPA: Summa Cum Laude

Adamson University | 01/2019

Senior High School: STEM Technology Track

GPA: Graduated with Honor
